Election/Restrictions

1. Applicant's election without traverse of Group II, claims 3-6 in the reply filed on Dec. 14, 2005 is acknowledged.

Drawings

2. Figures 6A-6C should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 3-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese reference 11-179754 taken together with Japanese reference 10-166409 in view of Nishida Pat. No. 6,042,364.

Application/Control Number: 10/764,601

Art Unit: 1732

Japanese '754 discloses a pair of semi-hollow primary molded products 1,2 5. which the butt ends form a joining space on an outer periphery. An injection molding for uniting the primary semi-hollow bodies into a single body is performed by filling the joining space and "the resin R is injected in such a state that the molds 3,4 are slightly opened and the molds are clamped after filling to press the resin R charged in the weld groove M", see abstract. The filling pressure of the molten resin moving the mold is clear from Japanese '754 "the resin R is injected in such a state that the molds 3,4 are slightly opened". Japanese '754 does not disclose the method for molding the primary molded products 1,2. Japanese '409, which is by the same inventor and assignee. teaches the injection molding of the primary semi-hollow bodies and the sliding of the slidable mold relative to the movable mold to butt ends. The forming of the molded products 1,2 of Japanese '754 by injection molding and then sliding a mold relative to the other mold would have been obvious to a person of ordinary skill in the art since the injection and sliding are known preliminary steps for forming the semi-hollow molded products. Nishida is cited for teaching the apparatus structure for the combination of the primary injection, sliding and secondary injection are known in the art of butt end joining. Therefore, the combination of Japanese '754 and Japanese '409 would have been well within the skill of the art of butt end joining.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jill L. Heitbrink whose telephone number is (571) 272-1199. The examiner can normally be reached on Monday-Friday 9 am -2 pm.

Application/Control Number: 10/764,601 Page 4

Art Unit: 1732

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Colaianni can be reached on (571) 272-1196. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
